

Ohio businesses
for a sustainable
economy

Our Mission

Ohio Sustainable Business Council is a state-wide business driven organization advocating for policies that support a vibrant, just and sustainable economy.

We are business leaders that believe that real prosperity involves respect for the environment, people and communities.

making *life* good together

What we stand for:

- Business practices that respect: people, planet and profit
- Economic Development that is smart, equitable, and community centric
- Energy that is renewable, clean and cost-effective
- Taxes that are fair and effective for multiple stakeholders
- Agriculture that is ecologically sustainable
- Trade that benefits all segments of the diverse economy

What our members are saying:

"The future of my company is not dependent on a tax break for me. It is dependent on having a strong, stable economy with a growing middle class, not a shrinking middle class."

- Barry Cik, Founder and Vice President Naturepedic, Chargin Falls, Ohio

"Ohio's oil and gas laws need to reflect the seriousness with which we regard both the health of our communities and our environment."

- Christine Hughes, Owner Village Bakery, Athens, Ohio

Join Ohio business leaders building
a smart, prosperous & sustainable
economy!
